Care

Stone

In favour of the planet, we created the Kreafunk Care range. It's a series of products with eco-friendly advantages consisting of our Stone and Wheat line.

The Kreafunk Stone collection benefits:
Like nature, each product is unique and has its own expression. The surface is rough and will, in time, achieve a unique patina. It hasn't had any surface treatment or chemistry, so its use and surroundings will naturally affect the material. You can use a wet cloth to wipe the concrete surface, but the patina will stay just like the sun in the sky.

The fabric on this product is made from 98% recycled polyester from Gabriel and is even 100% recyclable after use. This is one way to be kind to the planet. We like being kind.

In addition, this box is made from 100% recycled paper, which means it has been on many adventures before turning into this protective piece of packaging. And the journey continues if you recycle your box properly.

Thank you for choosing us! We're glad that this one found a new home.

At Kreafunk we combine creativity, functionality and a love of music with technology and the latest colour trends.

But we are more than that. Kreafunk products are created to be with you at all moments. Big and small.

Hope you'll love it.
